

# Corporate Social Responsibility - 2011

This year as CSR (Corporate Social Responsibility) initiative, all employees of VM joined hands in contributing generously to Sneha Care Home which is home for 100+ children living with HIV+. Our attempt was to enable Sneha care home to comprehensively address the multiple issues of HIV+ infected children, to prepare them for productive and constructive life by providing them with a platform to protect the children from exploitation, abuse, violence and discrimination in the absence of their near and dear ones.

For the last three years, they have been partially supported by a project named, USAID Samastha. As long as they had the project support nutritional and medical care of the children were met by the project. But as the project period has concluded, one of their major concern now is to provide care for these children.

Vmoksaites came together in not only pooling enough money to take care of some of their expenses, but above all to spend some quality time with these deprived children.
